LEGENDA

RELEVO

ELEVACOES EM PÉS

As formas do terreno são indicadas por relevo sombreado, cores hipométricas, curvas de nível e curvas de nível de intervalos de 1000 pés, referidas ao nível médio do mar (MSL), com intervalos de 300 pés quando necessário.

Land forms are shown by shaded relief, hypsometric tints, spot elevations and contour lines at 1000 feet intervals above mean sea level (MSL), with 300 feet intervals contour lines when necessary.

ELEVACOES DO TERRENO

A maior elevação (total conhecida) nesta carta é de 6158 pés a 22° 15' S, 48° 40' W.

The highest known elevation is 6158 feet at 22° 15' S, 48° 40' W.

normal, oitavo e o mais alto 3609 4252 6158

normal, eighth and the highest 3609 4252 6158

As notas indicadas com um ponto são precisas. As indicadas com um "x" são duvidosas e aquelas sem esses sinais são de localização incerta.

Spot elevations shown with a dot are accurate. Those shown with an "x" are questionable and those without any of these signs are of uncertain position.

CONSTRUÇÕES

Localidades com mais de 500.000 habitantes

Localidades de 100.000 a 500.000 habitantes

Localidades de 20.000 a 100.000 habitantes

Localidades com menos de 20.000 habitantes

Estações isoladas

Estações de pista dupla

Estações pavimentadas

Outras estradas

Estações de Ferro de várias linhas

Estações de Ferro de linha única

Localities over 500,000 inhabitants

Localities from 100,000 to 500,000 inhabitants

Localities from 20,000 to 100,000 inhabitants

Localities under 20,000 inhabitants

Isolated buildings

Dual air roads

Paved roads

Other roads

Multiple track railroads

Single track railroads

Localities over 500,000 inhabitants

Localities from 100,000 to 500,000 inhabitants

Localities from 20,000 to 100,000 inhabitants

Localities under 20,000 inhabitants
